

WHY KARATE FOR KIDS ?

EVERY CHILD WINS !

At HAUTH'S TAEKWONDO we have no bench sitters, every child wins because every child participates. All children progress individually at their own pace and are not judged against others. At HAUTH'S TAEKWONDO we believe every child is a winner.

CONVENIENT SCHEDULES !

Our class schedules are designed with parents in mind with classes scheduled six days a week with evening and Saturday morning classes.

SCHOOL WORK AND GRADES !

Most of our parents are very excited to find out that not only do their children have time for TAEKWONDO lessons but also many of them see a noticeable improvement in their child's grades. Developing a child's sense of self-esteem carries over in all that they do including the confidence and dedication it takes to maintain good grades.

QUALITY INSTRUCTION !

All of HAUTH'S TAEKWONDO instructors must qualify for national teaching certification before they are allowed to instruct at any TAEKWONDO club. Part of this training focuses on the instructor learning the newest and most innovative teaching methods - with an emphasis on positive reinforcement - which allows him or her to teach a challenging class that keeps the student motivated and excited.

TAEKWONDO AND YOUR CHILD !

TAEKWONDO challenges the entire body developing coordination, balance, agility and poise. Factors often neglected in many team sports. But most of all , TAEKWONDO is for all kids whether they're athletic, energetic, awkward or shy, bold, nice or maybe even a little wild once in a while ... TAEKWONDO is probably for a kid just like yours.

HOW DO I SIGN MY CHILD UP !

The cost of our five week introductory program is just \$59. This two week program gives many children and parents an opportunity to experience TAEKWONDO for the first time. It also allows the instructor to evaluate each student and recommend which ongoing program will benefit the student most.

Just call the number below and set up your **FREE** orientation class.
